

What is claimed is:

1. A support apparatus for supporting recycled use of equipment of a user, comprising:

5 an information obtaining unit obtaining equipment information about the equipment to be received from the user; and

 a determination unit determining according to information obtained by said information obtaining unit whether or not treatable articles restriction
10 standards of a receiver of the equipment are exceeded.

2. The apparatus according to claim 1, further
15 comprising:

 a charge determination unit determining whether or not a user is to bear a charge for recycle.

20 3. The apparatus according to claim 2, further comprising:

 a payment method determination unit determining a method of paying a charge when said charge determination unit determines that a user is
25 to pay a charge.

4. The apparatus according to claim 2, further comprising:

5 a calculation unit calculating the charge according to information obtained by said information obtaining unit.

5. The apparatus according to claim 3, wherein
10 when said charge determination unit determines that a user is to pay a charge, the apparatus first confirms a payment of the charge by the user, and then performs a receiving process.

6. The apparatus according to claim 1, wherein
15 said information obtaining unit obtains information from a user over a network.

7. The apparatus according to claim 1, further comprising:

20 a location management unit managing a location and a type of the received equipment; and

a plant determination unit determining a plant which processes the equipment based on the location and the type of the equipment.

8. The apparatus according to claim 1, further comprising:

5 a progress information generation unit generating information about progress of recycling equipment.

9. A program used to direct a computer to function as:

10 an information obtaining unit obtaining equipment information about the equipment to be received from the user; and

15 a determination unit determining according to information obtained by said information obtaining unit whether or not treatable articles restriction standards of a receiver of the equipment are exceeded.

10. The program according to claim 9, further comprising:

20 a charge determination unit determining whether or not a user is to bear a charge for recycle.

11. The program according to claim 10, further comprising:
25

a payment method determination unit determining a method of paying a charge when said charge determination unit determines that a user is to pay a charge.

5

12. The program according to claim 10, further comprising:

a calculation unit calculating the charge according to information obtained by said information obtaining unit.

10

13. The program according to claim 11, wherein

when said charge determination unit determines that a user is to pay a charge, the computer first confirms a payment of the charge by the user, and then performs a receiving process.

15

14. The program according to claim 9, wherein

said information obtaining unit obtains information from a user over a network.

20

15. The program according to claim 9, further comprising:

a location management unit managing a location and a type of the received equipment; and

25

a plant determination unit determining a plant which processes the equipment based on the location and the type of the equipment.

5 16. A supporting method of supporting recycled use of equipment of a user, comprising:

obtaining equipment information about the equipment to be received from the user; and

10 determining according to information obtained by said information obtaining step whether or not treatable articles restriction standards of a receiver of the equipment are exceeded.

15 17. The method according to claim 16, further comprising:

determining whether or not a user is to bear a charge for recycle.

20 18. The method according to claim 17, further comprising:

determining a method of paying a charge when said charge determination step determines that a user is to pay a charge.

25 19. The method according to claim 17, further

comprising:

calculating the charge according to
information obtained by said information obtaining
step.

5

20. The method according to claim 18, wherein
when said charge determination step determines
that a user is to pay a charge, a payment of the
charge by the user is first confirmed, and then a
receiving process is performed.

10

21. The method according to claim 16, wherein
said information obtaining step obtains
information from a user over a network.

15

22. The method according to claim 16, further
comprising:

managing a location and a type of the received
equipment; and

20

determining a plant which processes the
equipment based on the location and the type of the
equipment.
